TITLE : MULTILAYERED LABEL FOR DRUG MANAGEMENT

ABSTRACT : PROBLEM TO BE SOLVED: To provide a multilayered label for drug management with which the drug management of high reliability is possible and the easy and sure quality inspection of the label is possible and which facilitates handling and can reduce the burden of health care workers, such as doctors and nurses.

SOLUTION: The label to be affixed to a drug container or package of medical supplies has a first layer label 12 which exists on a front surface side, a second layer label 14 which is laminated under the first layer label 12, a release sheet 16 which is laminated by having a release layer 36 under the second layer label 14 and a release material, such as another lower layer sheet. The first layer label 12 and the second layer label 14 are provided with sheet-like label base materials 18 and 26 which are printed with information inclusive of the same contents, for example, drug names, capacity, etc., and tacky adhesive layers 32 which are formed on the rear surfaces of the label base materials 18 and 26. The label base material 18 of the first layer label 12 is made of a transparent resin sheet and the printing contents of the second layer label 14 are visually recognized through the first layer label 12 from the first layer label 12 side.
